Hybrid swivel chair
in light design

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

Why se:air?

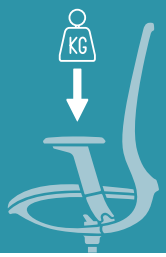

Best comfort for the back

due to automatic backrest pressure and optional lumbar support

Breathable, air-permeable, light

the membrane in the seat and back makes it possible

Ergonomic without any need for adjustment

due to innovative "Kinetic Swing" mechanism

The high-quality membrane

ensures comfortable seating and optimum stability

Modern design, fresh look, flexible all-rounder

se:air is ideally suited for co-working spaces, offices and the home office

Sustainable design

Low material usage → Low total weight → 100% recyclable

Monochrome Design

se:air is available in five different colour versions

DESIGNED TO INSPIRE

Elegant and filigree

The more hybrid, agile and individual the work becomes, the more dynamic and uncomplicated the office swivel chair needs to be – no matter where the work is done. In open spaces, in individual offices and in the home office, light and filigree design is more in demand than ever. That is why lightness in the workplace now has a new name: se:air.

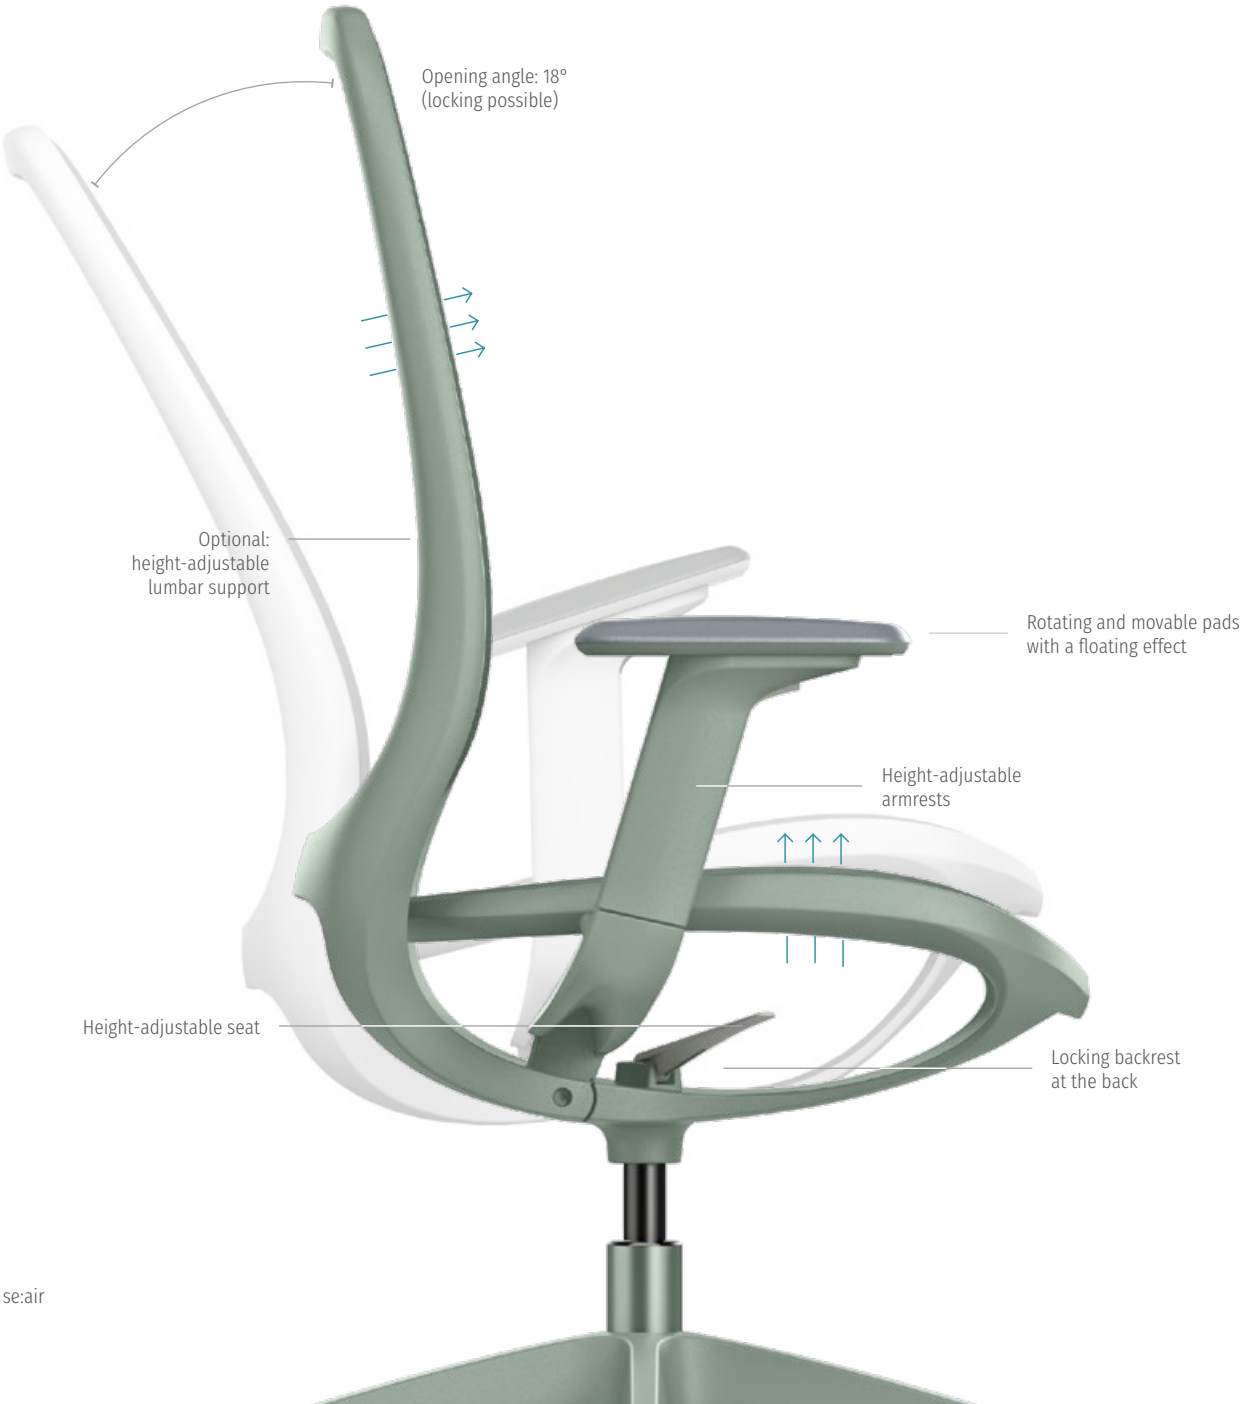

The organic design blends harmoniously into any working environment

ADJUSTED TO THE USER

Mechanism for minimalists

With se:air, the most critical requirements for a swivel chair are met: plenty of freedom of movement, ergonomic sitting and total comfort. The patented “Kinetic Swing” mechanism automatically detects the user’s weight without them having to think about it or adjust anything themselves. The seat height and the multifunctional armrests can be manually adjusted for this purpose. The principle is simple: Just sit down and get started.

Sedus patented “Kinetic Swing” mechanism
se:air has an automatic weight adjustment without any tedious adjustment required: The higher the user's weight, the greater the resistance when leaning against the backrest

Typical application areas for se:air are:

- Team workstations
- Project rooms & agile workshops
- Meeting & seminar rooms
- Single workstations and home office
- Non-territorial working
- Hot desking and collaboration zones
- Co-working spaces

TRANSPARENCY AND FRESH LOOK

Light meets comfortable

Keeping cool is no problem with se:air. It doesn't have the ‘typical’ classic full upholstery. Instead, it has an air-permeable mesh membrane in the seat and backrest, thus ensuring breathable comfort. Different sitting positions and movements are optimally supported due to the changing degrees of hardness in the membrane. Heat accumulation at pressure points, pressure sores and slipping around on the seat are thus easily prevented.

The high-quality membranes have different degrees of hardness in the backrest and seat. Without visible seams, the membrane is secured in the frame and thus offers optimal support

se:air is available in five monochrome colour versions

1

2

3

4

5

1. The membrane in the seat and the backrest ensures lightness and comfortable sitting

2. The multifunctional armrests are height-adjustable, including sliding pad with floating effect (can be moved forwards and backwards without locking, can be rotated inwards and outwards)

3. The optional lumbar support strengthens the lower back and ensures ergonomic sitting

4. The “Kinetic Swing” mechanism means there is no need for adjustment

5. se:air can also be configured as a counter version upon request

WITH AN EYE FOR DETAIL

Sustainable, durable, modern

The filigree se:air design is not only visually convincing. It also stands out due to its sustainable features. As early as in the design process, efforts were made to reduce the individual components and to leave out what was redundant. This results in a light, total weight of only 12 kg and a recyclability of 100%.

The black frame material is partly made of recyclate, and the tear-resistant, extremely durable membrane is “Made in Germany”. It is knit to a perfect fit, so that there is no waste. The functional armrests, the base with five legs and the optional lumbar support elegantly round off the swivel chair.

VERSIONS AND MODELS

That’s all it takes

se:air follows a monochromatic colour concept. The frame, membrane, armrests and castors are all designed in the same colour.

Frame colour, armrests, base incl. castors, optional lumbar support

Clear white | Black | Midnight blue | Ruby red | Sage green

Membrane for backrest and seat

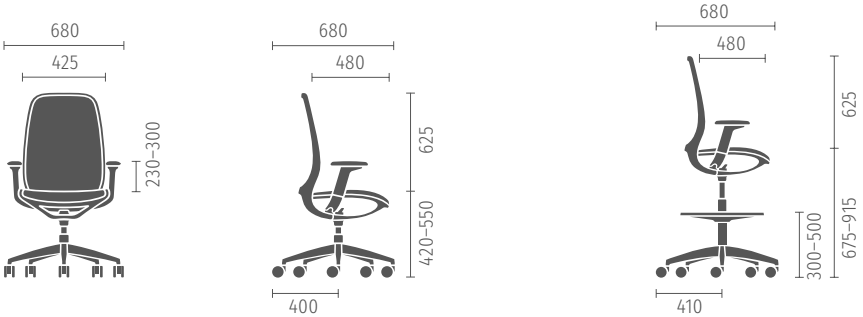

Silver grey | Black | Midnight blue | Ruby red | Sage green

Armrest pads

Basalt grey | Black | Basalt grey | Basalt grey | Basalt grey

Lever for height adjustment, lever for locking the backrest

Basalt grey | Basalt grey | Basalt grey | Basalt grey | Basalt grey

Beautifully combined

Sedus colour schemes

A harmonious environment contributes significantly to well-being and productivity. Thoughtfully designed furnishings, pleasant material and surface combinations as well as the choice of colour accents optimally complement the overall appearance. The four colour schemes Smart Balance, Urban Living, Soft Being and Multi Creation can be used to design working environments and suitable se:air settings.

This colour scheme corresponds to the Sedus Smart Balance concept.

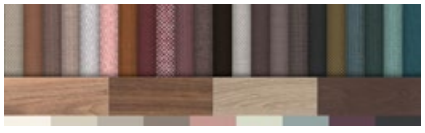

Smart Balance

light, reduced, calm, structured, functional, technical

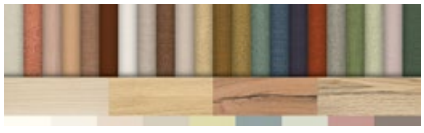

Urban Living

comfortable, respectable, urban, elegant, intense, timeless

Soft Being

gentle, calm, balanced, natural, inviting, regenerative

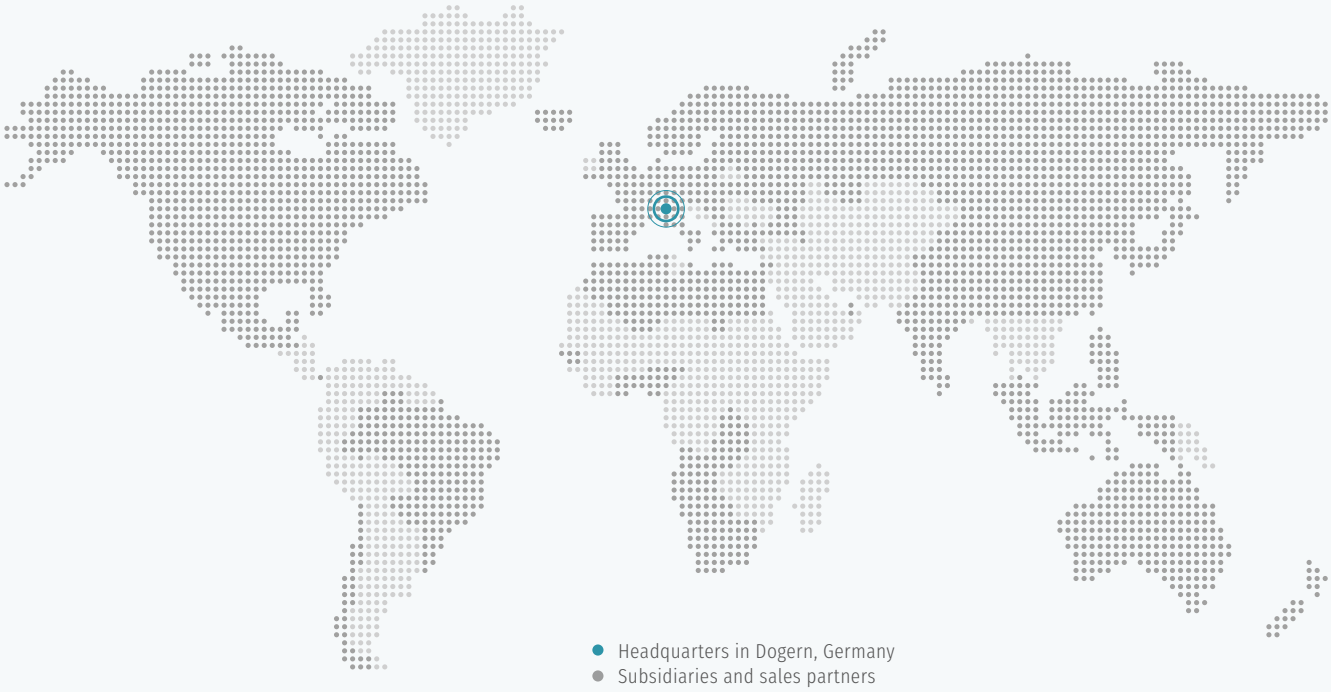

Multi Creation

motivating, inspiring, creative, dynamic, active, open, free
